The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to **support** competition and open access for local phone service.

Sincerely,

delina Murphy

Subject: UNE and UNE/P Concerns

Updated Letter - My apologies - the earlier one was incomplete.

Dear Chairman & Commissioners,

As an ISP competing in the shadow of Verizon. I am indignant to see they are acting as expected trying to eliminate the UNE provisions of the Telecomm Act. They have what they want, and like a child that follows rules to get a reward (Long Distance), once achieved, what got them there no longer is important.

Isn't a 22+ BILLION dollar quarterly profit enough? Isn't their multi-billion dollar market leading wireless "venture" enough? If you let them have everything they want, companies like mine will cease to exist. They don't want to compete, they just want my customers. They want everyone's customers.

As for the view that a handful of major players is enough for the American public, I will say that America was not built on monopolies, but on hard working entrepreneurs like myself and my company. Customers deserve choices besides mega-companies like Verizon.

You simply must not allow Verizon to have everything they want. They are successful enough without your help.

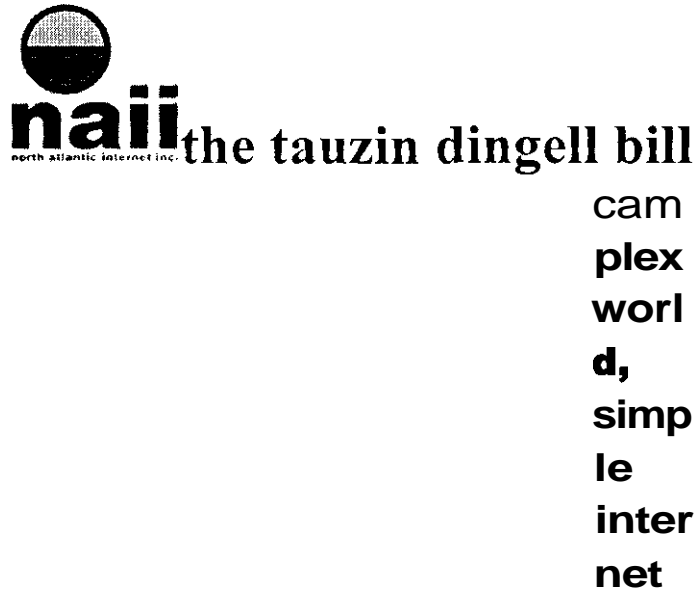

I have also attached some thoughts regarding Tauzin Dingell (because it has not gained traction, the bells have taken over the UNE front). Hopefully someone will see they are attacking competition from "ALL" angles. They are a ruthless competitor.

E. Burke Anderson

"Competition is a sin."

— Nelson D. Rockefeller

That little known quote exemplifies EXACTLY what the powerful bells are trying to accomplish with the passage of this bill. It will all but eliminate competition in the telecommunication industry and force smaller companies, like mine, out of business.

Imagine spending a million dollars a week for advertising to get this bill passed? That is exactly what the bells **are** doing to get votes for this bill. It is very important to them, **as** was control of an industry in the days of Mr. Rockefeller. The money these giants are spending on this bill alone easily surpasses the budgets of most businesses in the United States. They are ruthless giants throwing their weight around.

The sole purpose it to eliminate competition and establish a monopoly and an eventual cartel-based system for the all important telecommunications industry. The drug industry, the banking industry, and the oil industry all have their cartels firmly in place. Telecommunications is the "Oil Well" of today's economy. They want control.

I urge you to contact the Massachusetts delegation to oppose this anti-competitive and monopolistic bill. It will mean the end to businesses like mine who would no longer be able to compete. Their Christmas **Party** budgets are more than my company's entire payroll for a year. My company is not tiny, and employs 16 people in the state of Massachusetts. We do millions a year in revenue. We annoy them because they have to deal with us. To them it would be easier if they could just have our customers.

02/03/03

I am free to discuss at any time. If you call and I am not available, please hit zero and have me paged. I can also come to Washington, D.C. to speak with you if you wish.

Warm Regards,

E. Burke Anderson
